

THE ULTIMATE MODEL OF RC CARS

Full Kit Debuts 2nd Production Run Confirmed

The GRK5-R, which gained major attention as the winning machine at the R.C.D.C. All Japan Championship 2024, is now available as a full kit with standard gear components. As soon as the release was announced, orders flooded in—so much so that a second production run had to be confirmed on short notice. The GRK5-R offers the highest level of control in the GRK series and allows users to switch between mid-motor and rear-motor setups, giving drivers the flexibility to fine-tune their car based on driving style or track layout. The full kit is priced at ¥176,000 (tax included).

INTERNATIONAL TEAM 2025

The International Team Is Here !

SHIBATA GRK RACING has launched a new international team. Led by Hayato Yoshida of Japan—overall champion of the 2024 R.C.D.C. All Japan Championship—the team also includes Takumi Shimada (Japan), Vittorio Santiago (USA), and Tre Howard (USA). Together, they aim not only to compete for victories at major events, but also to share the thrill of RC drifting with fans around the world.
